WHY TIMMDEK®

Timmdek® was founded by a passionate team that has always believed in finding big solutions to big problems. That’s why we created our environmentally conscious line of decking.

For an eco-friendly solution to be undeniable, not only does it have to help the environment—but it’s got to be **BETTER** than any other product on the market. That’s exactly what *Timmdek®* is. There is **NO OTHER** material, whether natural or artificial, that has the aesthetic and the quality of our products.

SUSTAINABLE

Not a single tree must be felled to create your deck. There is a peace of mind that comes with knowing that you’re helping preserve our environment, and combating deforestation.

LOW MAINTENANCE

Once your project is built, there is no work left to be done. Very little maintenance is required to keep your deck looking brand new for years to come.

NO CHEMICAL TREATMENTS

Wood rots and often becomes food for insects. When that wood is your deck, you’ve got to treat it with harsh chemicals that are both bad for you—and for our environment. With *Timmdek®*, there are no chemicals required to maintain your deck.

UNMATCHED PROTECTION

The beauty of *Timmdek®* is in its unique combination of materials. The core of each *Timmdek®* board is made of 95% recycled plastic and wood. We care about our environment, and we know you do too. That’s why we use recycled High Density Polyethylene (HDPE) and Bamboo, both incredibly durable and resilient materials. This renders your decking impervious to weather, staining, scratches, nicks, dents, and damage!

TIMMDEK® BENEFITS

LOW MAINTENANCE	SLIP RESISTANT	WEATHER RESISTANT	UV RESISTANT	ECO FRIENDLY	MOISTURE RESISTANT

WE STAND BY OUR PRODUCTS

At *Timmdek®*, we know our products are built to last. That’s why each one of our composite decking technologies comes with a limited warranty.

Products that are installed according to our Installation Guidelines are covered under warranty, specifics can be located at www.timmdek.com.
